Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Braudaway et al (US 5,530,759).

#### **Claim 1:**

Braudaway discloses:

“obtaining digital data of a transformed representation of the image”, see Fig. 2 item 202;

“determining a transformed representation of the watermark for optimized visibility of the watermark in the image”, see Fig. 2 items 206, 214, ABSTRACT lines 1-3;

“and superposing the transformed representation of the watermark on the transformed representation of the image”, see Fig. 2 items 214, 215, ABSTRACT lines 1-3.

Claim 4 is inherent to Braudaway's disclosure.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Braudaway et al (US 5,530,759).

Claim 2:

Braudaway does not explicitly disclose that the transformed representation of the image is a compressed representation as claimed in claim 2. However, compression is very well known coding technique in the art that would reduce transmission or storage requirements; thus, an artisan would be motivated to implement this technique in Braudaway's system, because this implementation would reduce transmission or storage requirements. Therefore, the claimed invention would have been obvious to a person of ordinary skill in the art at the time the invention was made.

Claim 3 is rejected for the same reasons as claim 2, the DCT is a well known transformed representation that has a strong energy compaction property.

***Allowable Subject Matter***

5. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

6. Applicant's arguments have been fully considered and they are persuasive. Therefore, the rejection is withdrawn. A new ground of rejection is presented above.
